INDONESIA

Dear Andy Basuki,

Thank you for applying for Web Search Evaluator - Indonesia with Appen. As part of your application process we require you to take a pre-screen assessment, which has three sections. Our goal is to make sure you have every opportunity to join our projects and to become a member of the Appen family.

Our pre-screen assessment is challenging and does take focus, concentration and effort. It is a test of the critical thinking skills required in web search evaluation project work.

Following are things we have found that will improve your chances of completing the pre-screen assessment successfully:

Remember to read the guidelines thoroughly, understand the instructions and most of all **take your time, especially in Section 1 as the results will greatly determine your eligibility to move forward in the process.**

The best environment is a quiet place where you will not be interrupted. If you have a headset, use it. Headsets keep distractions to a minimum.

Following the above guidelines should improve your results.

Remember, we want you to join our team and contribute to these exciting and interesting projects. When you are ready, please follow the link below to start the pre-screen assessment, titled "Search Screening Test".

If you encounter any technical issues please email [recruitment@appen.com](mailto:recruitment@appen.com). Include your name, email address on file and the technical issue you are experiencing. Please be aware that there will be no opportunities to re-take this assessment.

Best regards,

The Appen Recruiting Team
